Foreword

The Navy-wide Personnel Survey (NPS), which is administered annually, is one part of the Navy Personnel Survey System (NPSS) originated by the Navy Personnel Research and Development Center. The NPSS is designed to manage and control Navy personnel surveys to minimize intrusion into fleet and shore operations and to serve as a vehicle for attitude and survey research. The NPSS is composed of NPS, special surveys, and quick-response surveys. NPS 1993 examined the perceptions of personnel in a variety of areas including detailing and assignment process, quality-of-life programs, leadership training, organizational climate, and health issues. The information is valuable to managers and policy makers in program formulation and evaluation.

NPS 1993 was conducted under the sponsorship of the Chief of Naval Personnel (PERS-00) within reimbursable Work Unit (94WRPS512). Data collection concluded in mid-December 1993 and the results of the survey were briefed to the Chief of Naval Personnel, his staff, and sponsors in February 1994.

This technical note, one of a series documenting the results of NPS 1993, provides statistical tables for enlisted personnel. NPRDC-TN-94-17 provides statistical tables for officers. A management report and a series of special reports on specific survey topics will follow.

Any questions regarding this report should be directed to David Tyburski, (619) 553-7653 or DSN 553-7653.

Summary

The fourth annual Navy-wide Personnel Survey (NPS) was mailed in September 1993 to a random sample of 17,902 active duty enlisted personnel and officers. Completed questionnaires were accepted through mid-December 1993. The adjusted return rate was 44%. Survey topics included detailing and assignment process, quality-of-life programs, leadership training, organizational climate, and health issues. Responses were weighted to allow generalization of sample results to the Navy population. Responses of enlisted personnel are broken out by paygrade and other important demographic variables.

Introduction

Problem

The morale and job performance of Navy members take on added importance in an era of downsizing, where each individual must contribute to the increased efficiency required of a reduced force in a still-hostile world. Navy members' attitudes and opinions represent input vital to the development and continuous improvement of Navy policies and programs; therefore, such opinions must be measured in a systematic and timely fashion, thus furnishing an accurate reflection of the views of its diverse and widespread membership.

Purpose

The annual Navy-wide Personnel Survey (NPS) was designed to collect opinion data on a systematic basis and to provide timely information on issues of importance to policy makers. The annual sampling, representative of the entire Navy population, will allow the identification and analysis of trends in opinions and attitudes toward plans, programs and policies which materially affect the performance and morale of Navy members. The survey was also designed to accommodate the study of topics of compelling interest on a one-time basis. This technical note provides enlisted personnel results of NPS 1993, the fourth administration of NPS.

Approach

NPS questionnaires were mailed in September 1993 to a random sample of 17,902 enlisted personnel and officers with a projected rotation date of December 1993 or later. Members who received the 1992 survey were not eligible for inclusion in the sample. The sampling represented approximately 4% of the eligible enlisted population and 11% of the eligible officer population. Of the original sample, 858 surveys could not be delivered. Reminder/thank you postcards were mailed to the entire sample 5 weeks after the surveys. The adjusted return rate was 44%. Unadjusted return rates for paygrade groups, total enlisted, and total officer groups are displayed in Table 1.

The survey requested demographic information and measured military members' attitudes and opinions in various areas, including detailing and assignment process, quality-of-life programs, leadership training, organizational climate, and health issues. Of the total 223 questions, 84 questions appeared on both the 1992 and 1993 surveys. Twenty-eight questions appeared in all four surveys.

This technical note provides the 1993 results in statistical tables for enlisted personnel, while a companion technical note (Quenette, 1994) provides officer statistical tables. A management report and a series of special reports on specific survey topics will follow. Results of previous surveys are documented in Quenette, Kalus, Hase, & Brinderson (1991a, 1991b, 1991c, 1991d), Quenette (1992), Quenette, et al., (1992a, 1992b), Wilcove (1992), Wilcove & Quenette (1992a, 1992b), Quenette, Steerman, & Le (1993a, 1993b), and Quenette, Steerman, Le, & Bendik (1993a, 1993b), Hollingsworth (1993).

The statistical tables are based on weighted data. Responses were weighted by paygrade to reflect each paygrade's actual proportion in the Navy, thereby allowing generalization of sample results to the entire Navy. Separate weighting schemes were employed for enlisted and officer personnel; within the enlisted/officer groups, each paygrade was weighted separately.

For statistical analyses, enlisted personnel were grouped according to paygrade: (1) E-2 and E-3; (2) E-4 through E-6; and (3) E-7 through E-9. Individuals in paygrade E-1 at the time of the survey were excluded because of their limited time in the Navy. Officers were assigned to one of three groups: (1) W-2 through W-5; (2) O-1E through O-3E and O-1 through O-3; and (3) O-4 and above.

How to Read the Statistical Tables

The information contained in each statistical table is described in Figure 1.

1. Question number and description of question.
2. Number of question from which respondent groups are derived.
3. Respondent groups.
4. Response options.
5. (Weighted) number of responses.
6. Column percent: For a given (weighted) respondent group, the column percent provides a distribution of responses across response options.
7. Total number of respondents (weighted) selecting option.
8. Percent of all respondents (weighted) selecting option.
9. Total number (weighted) of respondents.
10. Total number (weighted) of respondents in group.
11. Percent of all respondents (weighted) in group.
12. Number of respondents (weighted) who omitted question.

Note. The weighting procedure followed by rounding to whole numbers may sometimes produce a zero frequency combined with a nonzero percentage for a cell. For all practical purposes, such results may be ignored.

Figure 1. Statistical table for Question 12.

Organization

The sequence of statistical tables in this technical note corresponds to the sequence of the questions in the NPS 1993, except that the question on the date of survey completion follows the question on the date of survey receipt by the respondent. (A copy of the NPS 1993 appears in Appendix A.) In the first analysis for each question, all response options were included. A second analysis was conducted in which the "Does Not Apply" option was omitted. Also in the second analysis, response options were collapsed for agree/disagree questions, with "Strongly Disagree" and "Disagree" as one category and "Strongly Agree" and "Agree" as another. In addition, some questions were broken out by other demographic variables, and those results are displayed as well.

Margin of Error

Tabulated results are accurate (at a 95% level of confidence) within the margins of error displayed in Table B-2. (See Appendix B for a discussion of the margin of error in estimation of percentages.) In general, the error for the aggregated enlisted group would not exceed $\pm 1\%$, and would not exceed $\pm 2\%$ for the aggregated officer group.

PRIVACY ACT STATEMENT

Authority to request this information is granted under Title 5, U.S. Code 301, and Department of Navy Regulations, Executive Order 9396. License to administer this survey is granted under OPNAV Report Control Symbol 1000-17, which expires on 31 January 1994.

The purpose of this questionnaire is to collect data to evaluate existing and proposed Navy personnel policies, procedures, and programs.

The information provided in this questionnaire will be analyzed by the Navy Personnel Research and Development Center. The data files will be maintained by the Navy Personnel Survey System at the Navy Personnel Research and Development Center, where they may be used to determine changing trends in the Navy.

All responses will be held in confidence by the Navy Personnel Research and Development Center. Information you provide will be considered only when statistically summarized with the responses of others, and will not be attributable to any single individual. Personal identifiers will be used to conduct follow-on research.

Completion of this questionnaire is entirely voluntary. Failure to respond to any of the questions will NOT result in any penalties except possible lack of representation of your views in the final results and outcomes.

You will be given the opportunity to make written comments after each major section of the survey, as well as general comments at the end of the survey.

If you have any questions, you may contact:

90. How much do you AGREE or DISAGREE with the following statements regarding Physical Readiness Training (PRT)?

- a. Failure to comply with the physical readiness training (PRT) programs should be grounds for denying or deferring advancement/promotion
- b. The current PRT program policy encourages a routine workout program in order to pass the PRT test rather than encouraging a routine workout program to achieve a healthy lifestyle
- c. PRT results are documented fairly in fitness reports and enlisted evaluations for each member

91. What are the most important reasons you exercise on a regular basis (at least three times a week)?

(YOU MAY SELECT UP TO 2 ANSWERS.)

- ☐ To pass/do well on the PRT
- ☐ To control my weight
- ☐ To become/remain fit and healthy
- ☐ To reduce stress/make me feel better
- ☐ For the enjoyment of participating in sports
- ☐ Regular exercise is required at my command
- ☐ I do not exercise on a regular basis

92. How often do you eat FIVE servings of fruit and/or vegetables?

- ☐ Every day
- ☐ From three to six days per week
- ☐ One or two days per week
- ☐ Less than one day per week
- ☐ Never

- ☐ Does not apply/I do not use tobacco products
- ☐ I am not trying/do not plan to stop using tobacco products
- ☐ Expense of tobacco products
- ☐ Peer pressure/social pressure
- ☐ Detriment to my health/my family's health
- ☐ Inconvenience/messiness
- ☐ My command is a smoke-free command
- ☐ Personal desire to quit smoking
- ☐ Cost to nonusers of tobacco
- ☐ Other

94. Have you received training specifically addressing HIV/AIDS in the past 12 months? (SELECT AS MANY AS APPLY.)

- ☐ Yes, Navy training
- ☐ Yes, other military service training
- ☐ Yes, civilian (local community) training
- ☐ No

95. How much HIV/AIDS information have you received from each of the following sources in the past 12 months?

Appendix B
Margin of Error

Margin of Error

Tables B-1 and B-2 are used to estimate confidence intervals, or margins of error, around the estimated percentages contained in this technical note. Table B-1 displays the unweighted sample sizes and Table B-2 provides the confidence intervals around the estimated percentages. Reported results are accurate (at a 95% level of confidence) within the margins of error displayed in Table B-2. To find the margin of error for a given percentage, first consult Table B-1 to determine sample size, then look up the percentage error in Table B-2. The percentage error from Table B-2 is added to and subtracted from the estimated percentage for which you wish to determine the margin of error. For example, consider the item "I enjoy my career in the Navy." Thirty-nine percent of E-2 and E-3 members agreed, 55% of E-4 through E-6 members agreed, and 85% of E-7 through E-9 agreed. Total agreement was 55%. To find the margins of error for these percentages, first find the unweighted sample sizes in Table B-1. For all enlisted, total sample size was 4,731; for the other groups, it was 1,009; 2,119; and 1,603; respectively. Then, consulting Table B-2, locate the closest percentage split at the top of the table and the sample size in the first column. The intersection of these two provides the percent which is to be *added to and subtracted from* the estimated (reported) percentage to find the interval within which the true population percentage is likely to fall. For the total enlisted group in this example, the error would be approximately $\pm 1\%$; thus the true population percentage would likely fall within the interval of 54% to 56%. For the paygrade subgroups, the intervals would be: E-2 and E-3, 36% to 42%; E-4 through E-6, 53% to 57%; and E-7 through E-9, 83% to 87%. Note that the error increases in size as sample size decreases and as the percentage split approaches 50/50. For a small sample (e.g., 50), if the percentage split were 70/30, the error would be 13% on each side of the estimated percentage, the resulting interval being 57% to 83% (or 17% to 43%, if the reported percent were 30%). Clearly, *extreme caution* must be used in drawing conclusions from estimates based on small sample sizes.
